

4680 battery outdoor power supply

Overview

The EVE 4680 battery has a diameter of 46mm and a length of 80mm. In the mobile power supply and flashlight we use daily, the commonly used battery size is an 18650 battery with a diameter of 18mm and a length of 65mm and a 21700 battery with a diameter of 21mm and a length of. EVE 4680 battery has a 26Ah battery capacity, which is more than 5 times the current 21700 battery capacity and 8 times the 18650 battery capacity. In outdoor power supply applications, a EVE 4680 battery with the same capacity is equivalent to 5 21700. EVE is now focused on the large cylinder, while taking into account the square laminations. The cell of EVE 4680 battery model is INR46800. Due to the late entry into the field of power batteries, the shipment of the entire vehicle is relatively small, and the technology at the system level is relatively weak. Although. The 4695 large cylindrical battery system is a type cooling system developed on the basis of the 4695 large cylindrical battery. It has the characteristics of ultra-fast charging, high specific energy, long cruising range and high safety. ● Ultra-fast charging Three.
